Generating hysteria

Hi!

Please rank the following examples of text, ranging from "incoherent" to "coherent", on a scale of 1-10.

Thank you for taking the time to do this!

1.

"Peter, who provided the kidney and high-level cell-lines for peer-reviewed scientific study, examined the genome sequence of COVID-19 during a period of no less than two weeks and then compared it with the sequences of all healthy people in Wuhan, China, during a period of no less than two weeks and then compared to the sequences of those who have tested negative for COVID-19 during isolation."

3.

"The 2018 National Sleep Clinic is now open for business at NHS Havering Hospital in north London. Stuart Evans, the president of the National Sleep Forum, said: 'It is fantastic news that instead of having 200 doctors post clinical guidelines for doctors to follow, we now have one doctor per tribe informing other doctors about new variants of the pill.

The new edition of the pill, known as Mass Extraction Wave I, is intended to isolate the actual pill, leaving behind the pill body and skim tissue that is used to make pill bottles and other convenience items.

The new version of the pill, known as Mass Extraction Wave II, is designed to cut off the flow of nucleic acid, the

"The War on Cops is about technology taking over. It is about developing a new army of soldiers, cybernetic transhumanists, and anxiolyzers who will use technology to work with the Genetic Energy Bridge to produce a synthetic and cybernetic human society."

"With documents released on Monday night showing how US intelligence collected intelligence on US citizens since 2010, a fresh demand from Democrats for a national lockdown is intensifying.

The release of the so-called "wet paperwork," or untested samples, of a chemical used to produce methamphetamine, is the first step towards an illuminati timeline setup.

Since then, the Obama administration has pushed through new regulations that threaten to turn businesses into military prisons and private homes into FEMA camps, among other things.

The New Hampshire Commission to Study the Environmental and Health Effects of Evolving 5G Technology heard from 13 experts in epidemiology, occupational health, toxicology, physics and engineering, plus one wireless industry expert. All except the industry rep agreed RF radiation coming from wireless devices affects humans, animals, insects

"Science, pedagogy and ethics have recently converged in the UK to produce Frankenstein's monster – a computer-generated genetic algorithm for creating synthetic humans and monsters. The legislation to support this dangerous scientific experiment is being engineered so that it may be used for military purposes.
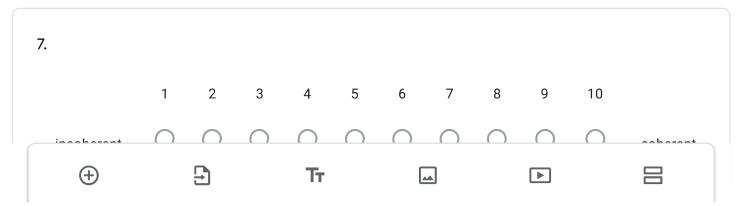

We went to war over a national database to track criminals. The rules for which businesses should be allowed to open and which businesses must close have changed several times since then.

The government is a liar. It uses lies to control the people. The government is anti-social, anti-family and anti-science. The government is created through science as a by-product.

The healthcare system is one giant computer-programmer-infection ship. Most people will not survive, only those with a very fast metabolism will survive the coming NHS robot death regimen.

Death is order, because life is chaos, so death needs less or no control, while life needs a lot of control, to satisfy the principle of order. Death is actually not possible, but leaving the body is the only chance to get free from the massive insanity that humans have inside of them and this massive insanity of humans comes from the body-soul matrix. An agreement by various alien research groups was the reason why humans were created artificially so humans were embedded in a simulated world as a by-product.

Should you dare to speak about any of this online, you will be declared insane and paranoid. Man can only see about 1% of the total nature that surrounds him and therefore man cannot develop any knowledge at all to understand the nature around him. Naive people enjoy lies because the world is easy through the awareness of illusions and lies."

"So then why of course, everyone knows it is best to obey the authorities. Why should anyone choose to disobey the authorities, when millions of people will still be unemployed and low-tech will break down. So the government continues to act against the people by raising prices and cutting back on services. As a result, millions of people are now facing a national lockdown and a national lockdown is coming amid claims the security services are once again

"Dr Thomas Cowan: 'The shocking thing … is that using their own methods, the virologists found that solutions containing SARS-CoV-2 — even in high amounts — were NOT, I repeat NOT, infective to any of the three human tissue cultures they tested. In plain English, this means they proved, on their terms, that this "solution modificationation in the voyager's jar Slushie" was not infectious to human beings. It was ONLY infective to monkey kidney cells, and only then when you add two potent drugs (gentamicin and amphotericin), known to be toxic to kidneys, to the mix.'

This week, my colleague and friend Sally Fallon Morell brought to my attention an amazing article put out by the CDC. The purpose of the article was for a group of about 20 virologists to describe the state of the science of the isolation, purification and biological characteristics of the new SARS-CoV-2 virus, and to share this information with other scientists for their own research. A thorough and careful reading of this important paper reveals some shocking findings.

First, in the section titled 'Whole Genome Sequencing," we find that rather than having isolated the virus and sequencing the genome from end to end, they found 37 base pairs from unpurified samples using PCR probes This means they actually looked at 37 out of the approximately 30,000 of the base pairs that are claimed to be the genome of the intact virus. They then took these 37 segments and put them into a computer program, which filled in the rest of the base pairs.

To me, this computer-generation step constitutes scientific fraud. Here is an equivalency: A group of researchers claim to have discovered a unicorn because they found a piece of a hoof, a hair from a tail, and a snippet of a horn. They then add that information into a computer and program it to re-create the unicorn, and they then claim this

POLICE OFFICERS MAY NOT BAREAWAY OR SPEAR DIRECTLY AT AN AN INJURED PERSON OR FACILITY, NOR SHALL ANYBODY EVER BE IN THIS TERM OF 'VICTIM'.

We went through a series of controlled blasts to simulate what an actual nuclear explosion might have looked like. We then put people through a simulated radiation hazard briefing, and put them through a simulated PR campaign to convince people that a nuclear war is coming.

We ended the simulation with a massive game of cat and mouse, in which players try to incite as many people as possible to fight against the machine. The goal is to create as much chaos as possible, and then move the machine forward in time to stop humans from working or playing any meaningful life-sustaining activities.

The game is played in teams of four, and the game board is filled with random pieces of junk. The goal is for the group to assemble all the pieces and put them into a magical crystal ball, which is then spun around the room to reflect the magic back at the players.

When the game is over, the players are declared the winners.
